Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, line 3, it is unclear what the limitation “them” refers to.

Regarding claim 1, line 4, the claim is being rejected as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted structural cooperative relationships are: the connection between the nuts, washers and other elements (i.e. bolts, block spacers, ...) in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2, as best understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Matlock (US 5,664,227).

Art Unit: 3725

Matlock discloses a device comprises an elongated container (24) with a top cover (26) and a bottom cover (28) and two elongated handles (40) interconnected (via elements 28' and 36) to two block spacers (see spacers between bolts (42) and their respective nuts) and an inner block spacer (30) located inside the container and with bolts (38) (42) through the bottom cover and the handle and nuts and washers (see fig. 2). The handles, bolts, nuts, washers and block spacers can be slip into the container body. Matlock discloses the device as claimed, and thus the device can be use as an aluminum can crusher (i.e. by inserting a can into the container and crush the can inside the container with a compacting force).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art listed on the attached PTO 892 are cited to show various manual can crushing devices.
